

Élections au sein du centre de la Francophonie des Amériques

Candidate: Frandy Pierre-Louis, 10, Lillavois 27, Bon Repos, Croix-des-Bouquets, Ouest, Haïti.

Dear Sir:

This letter is being sent to strongly recommend Frandy Pierre-Louis for the 2018 élections. I have known Frandy by working with him for the last four years. With his undergraduate degree in Psychology, he has stepped beyond his limited training to understand all aspects of mental health problems and solutions in his home country of Haiti. He has worked with teams of mental health professionals from the United States as often as they can come, providing cultural input, and treatment ideas to the group effort. He has learned from these experiences to do proper evaluations, and the principals of education, directive therapy and activities.

Frandy is working in an area of Haiti that has little infrastructure in mental health services, humans ressources services and although he carries less educational credentials, he is becoming an expert in evaluating and recommending treatments in his mental health field. He hopes to be a clinician and an educator in this needed field.

I recommend him highly to you as a bright young man who has much to offer his country in an underappreciated area of need.

I am a retired board certified psychiatrist/family doctor who has averaged 2 weeks / year of providing mental health care, primarily in Ouanaminthe at the Institution Univers Medical Clinic, but also at other places in the Northeast and West of the country over the past ten years. I work with a team of mental health professionals.

Thank you for this consideration of this young man. Sincerely,

James F. Druckenbrod, M.D. druckjj@gmail.com
